Horse	e Buying Checklist Page 15 of 1
4.	What is the horse's general demeanor under saddle? Watch for any signs of ear pinning, tail swishing, inattention, nervousness or spookiness.
	Notes:
5.	How responsive is the horse to the rider's cues? Is the horse soft and willing or resistant? How noticeable are the rider's cues? Pay special attention to gait transitions.
	Notes:
6.	Ask seller to have the horse do everything it has been advertised to do, even if you don't plan to make use of all the horse's talents. Make sure you see all gaits in both directions, halts from all gaits, backing, and if the horse was advertised as having lead changes, etc., ask to see those as well.
	Notes:
7.	If you still like the horse, ride it yourself and test everything it has been advertised to do. Note how responsive it is to your cues and whether you feel comfortable on it.
	Notes:
8.	If possible, ask to take the horse outside of the arena, even if you don't plan to ride on the trail. It will take the horse outside of its comfort zone and give you an idea about its general temperament. Does the horse stay quiet and relaxed, or does it become anxious or spooky? Is the seller hesitant when you ask to ride the horse outside of the arena, or do they even refuse to allow you to do so?
	Notes:
9.	If you are buying a horse for a specific purpose, such as trail riding or barrel racing, make sure you get to see and try it thoroughly in that context, even if it means the seller hauling the horse to a place where you can do that.

Horse Buying Checklist Page 16 of 16 Part III: Veterinary Pre-Purchase Examination Before purchasing any horse (or even accepting a free one!), ELS highly recommends you have a veterinarian who has never seen the horse before and has no relationship with the seller perform a thorough pre-purchase veterinary examination (PPE). For more information, please see the series of articles about PPEs that ELS has published in the Equine Legal Library at equinelegalsolutions.com under "Buying." **Part IV: Purchase Contract** When you are ready to purchase a horse, don't forget the purchase contract! Putting all the important terms in writing helps protect both parties. When buying a horse, if you rely on the seller to provide the sale contract (also known as a bill of sale),

you risk the contract favoring the seller and/or not containing all important terms. ELS has a variety of affordable purchase contracts that are specifically designed to protect buyers and are available for immediate download on its website at equinelegalsolutions.com.
